- Solar power keeps the bellbox battery charged for up to 3 years
- 100% Wirefree
- Fully upgradable

Summary

Our SolarGuard Multi-Zone control panel based system is the best of the bunch combining the latest zoning abilities with a totally wire-free operation.

Incorporating the revolutionary MU5850 control panel means you also get flexible operation including the ability to exit through other doors, and a dedicated chime zone - a great feature for protecting doors, garages and sheds at night.

As well as twin sirens fitted to the external SolarGuard it provides a built-in siren on the control panel which features entry/exit warning beeps and a useful audible test mode for checking detectors.

Specifications

System Range	20-30 Metres (Range Extender ET-01 available)
