

Complete Wireless Alarm System

An installers favorite - this alarm incorporates fully wirefree sensors with a traditional hard wired bellbox

- 2 PIR detectors included - and add as many as you like!
- Convenient handheld remote control included
- 100% Wirefree Sensors
- 7 Zone Control Panel with battery back up
- 1 Wirefree Door/Window contact included
- All batteries included
- Wired bellbox has full tamper protection and battery backup
- Fully upgradable

Summary

For those who cannot resist the temptation to go wireless this system incorporates both wired and wireless technology.

Whilst the detectors are fully wireless and the control panel operates from remote control, the external siren unit retains that traditional wired connection.

Upgrade this system with the ST01 Xenon Strobe Unit and it latches and remains flashing in the event the system is triggered - just like the wired systems.

Specifications

System Range	20-30 Metres (Range Extender ET-01 available)
