

## Auto Dialler

*Automatically calls 4 numbers with a recorded message in the event of an alarm.*

- Digitally record your own voice message
- Program up to 4 telephone numbers, including mobile numbers (emergency services are prohibited)
- Always know straight away in the event of an attempted burglary
- Works with any AEI wired or wirefree control panel (Except SG200)
- Requires connection to telephone network
- Requires no additional power supply
- User programmable security code for deactivation

### Summary

You program in 4 telephone numbers (not emergency services) and record your own voice message.

In the event of an alarm condition the auto dialler will call all 4 numbers and playback your pre-recorded message.
